

If you are an *Apple Stocks* user, *Apple's* management (below) has made it clear they are **no longer interested** in *Canadian news*. Which reeks politics, of course. If you're a Canadian *Apple* consumer, now you know.

Both managers below were contacted and seemed unconcerned their platform is missing **11% of all Market News** – including [our 613 Issuers](#).

That puts *Apple Stocks's* dataset at **89% complete**, rendering it useless. (*if it was a trading platform the SEC would shut it down as "incomplete data"*)

So Just Use Yahoo Instead; its already in your iPhone

Instead, simply go to *YahooFinance.com* [available here](#) as **you are already on an iPhone** (*the only platform that carries Applestocks*).

Or simply visit two Investor favorites with news in Real Time:

[Stockhouse](#)
[Stockwatch](#)

or, if **Trading** is in your mind, visit [TradingView](#) and sign up for a Free Trial.

If you are Apple user and wish to write to these two employees of yours, feel free;

[Lauren Kern](#) – Editor-in-Chief, *AppleNews* lkern@apple.com

[Dan Steckenberg](#), Managing Editor *AppleNews* dsteckenberg@apple.com
